-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prior Art figures 1-5 in view of U.S. Patent no. 6,247,663 to Matsuda.

Prior Art figures 1-5 disclose the disclosed invention except for an elongated opening in the bail support arm.

Matsuda, for example in figures 6A and 6B discloses an elongated opening 6g so that the urging member 7 can be acted on strongly using this simple construction of an elongated opening. With such an elongated opening, the bail is ensured to prevent not only error resets of the operating members but also shaking off of the bail 57 because of the inertia force.

It would have been obvious to one of ordinary skill in the art to provide the Prior Art figures 1-5 with an elongated opening as taught by Matsuda to lock the bail in both the winding and casting modes to prevent accidental movement of the bail. It is not explicitly stated but it is inherent that when the plunger reaches either end of the elongated opening that a sound is produced due to the force of the spring on the plunger.

Art Unit: 3654

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
